Hurst-Eules-Bedford ISD

Bedford, TX

Jim Shipley & Associates congratulates Hurst-Eules-Bedford (HEB) ISD for its implementation of the continuous improvement approach. For the past decade, JSA has supported HEB ISD in its continuous improvement journey. The results shown in this overview speak for themselves!

Continuous Improvement

Strategic Plan objectives are accomplished through repeated use of Continuous Improvement methods. The Hurst-Eules-Bedford ISD began using the Continuous Improvement approach in 2004. This means the District uses research and data as part of decision making, from the board room to the classroom.

Continuous Improvement Methods

Continuous Improvement means HEB is constantly seeking to improve processes and outcomes. HEB approaches every interaction each day with an attitude of “how can we make this better?” HEB uses data and research, along with expertise, to implement improvements that are efficient and effective. HEB has trained all campuses and departments on how to implement continuous improvement (see below).

The results speak for themselves. In 2004, HEB ISD had 15 “Recognized” campuses and 12 “Academically Acceptable” campuses, with no “Exemplary” campuses. In 2014, 100% of our campuses Met Standards, and 68% achieved academic distinctions exceeding most of our peer districts. It is clear that applying Continuous Improvement methods produces results, which means success for every child.

District Leadership - Continuous Improvement is used from the Board Room to the Classroom. See our Superintendent and Board President talk about the influence of CI: [videos forthcoming]

Students - Continuous Improvement methods have been deployed into the classrooms. Students and teachers utilize continuous improvement methods each and every day to influence their achievement. See their stories: [videos forthcoming]

Community - See our community partners discuss the influence of Continuous Improvement in the District [videos forthcoming]

Staff - CI methods have been deployed in every department in the district. See the these departments explain the positive impact of using CI: [videos forthcoming]
